Elsevier Sequoia S.A., Lausanne – Printed in The Netherlands

Subject index

Acetylcholine,
scanning curves and kinetics of the ——— /acetylcholine receptor hysteresis (Neumann et al.) 45
Aerobical bacteria,
model for regulation of H^+-ATPase functioning in ——— by membrane hyperpolarization caused by redox chain activation when utilizable sugars are applied (Vardanian) 249
Amino acid,
——— transport through supported liquid membranes: mechanism and its application to enantiomeric resolution (Yamaguchi et al.) 109
Amoxycillin,
polarographic and microcalorimetric study of the interaction between glutathione and ——— (Squella et al.) 125
Audio-frequency,
on the audio- and radio-frequency dielectric behaviour of anchorage-independent, mouse L929-derived LS fibroblasts (Davey et al.) 83

Bacteriorhodopsin,
proton–magnesium exchange during the blue–purple transition of ——— (Tsuji, Hess) 203
Bioactive molecules,
electrochemical study of the metal ion coordination of ——— (Burger) 33
Bioelectroanalytical sensors,
——— and analytical problems in their application (Review) (Nagy, Pungor) 1
Biotechnology,
effects of electric fields and currents on living cells and their potential use in ———: a survey (Teissié) 133

Calcium,
stoichiometry of the binding of Ca^{2+} on the inner and the outer monolayers of sonicated vesicle bilayers (Disalvo, Bakás) 257
Cardiolipin,
properties of ——— and functional implications for cytochrome oxidase activity (Marsh, Powell) 73
Cell processes,
generation of ——— in a high frequency electric field (Margolis, Popov) 143
Clostridium sporogenes,
electrosynthesis and electroanalysis using ——— (James et al.) 21
Coordination,
electrochemical study of the metal ion ——— of bioactive molecules (Burger) 33
Cytochrome *c*,
photocurrent transients from the semiconductor–protein interface (Ramsden et al.) 269
Cytochrome oxidase,
properties of cardiolipin and functional implications for ——— activity (Marsh, Powell) 73

Diamines,
electrooptical study of purple membrane fragments in the presence of ——— (Taneva et al.) 241

Electric currents,
effects of electric fields and currents on living cells and their potential use in biotechnology: a survey (Teissié) 133
Electric fields,
effects of ——— and currents on living cells and their potential use in biotechnology: a survey (Teissié) 133
Generation of cell processes in high frequency ——— (Margolis, Popov) 143
Electroanalysis,
electrosynthesis and ——— using *Clostridium sporogenes* (James et al.) 21
Electrofusion,
correlation between physical parameters in ——— and electroporation of protoplasts (Zhelev et al.) 155

Electroporation,
correlation between physical parameters in electrofusion and ——— of protoplasts (Zhelev et al.) 155
———: the population distribution of macromolecular uptake and shape changes in red blood cells following a single 50 μs square wave pulse (Bliss et al.) 57
Electrostimulation,
——— during fermentation (Grosse et al.) 279
Electrosynthesis,
——— and electroanalysis using *Clostridium sporogenes* (James et al.) 21
Enantiomeric resolution,
amino acid transport through supported liquid membranes: mechanism and its application to ——— (Yamaguchi et al.) 109
Enzyme,
how a soluble ——— can be forced to work as a transport system: theoretical interpretation (Vincent et al.) 215
Influence of the ionic strength on ——— solubilization in water-in-oil microemulsions (Bratko et al.) 291

Fermentation,
electrostimulation during ——— (Grosse et al.) 279
Fibroblasts,
on the audio- and radio-frequency dielectric behaviour of anchorage-independent, mouse L929-derived LS ——— (Davey et al.) 83

Gibbs free energy,
transduction of redox ——— into modulated electrochemical work (D'Alba, Di Lorenzo) 195
Glutathione,
polarographic and microcalorimetric study of the interaction between ——— and amoxycillin (Squella et al.) 125

H^+-ATPase,
model for regulation of ——— functioning in aerobical bacteria by membrane hyperpolarization caused by redox chain activation when utilizable sugars are applied (Vardanian) 249
HeLa cells,
potential-controlled morphological change and lysis of ——— cultured on an electrode surface (Yaoita et al.) 169

Hyperpolarization,
model for regulation of H^+-ATPase functioning in aerobical bacteria by membrane ——— caused by redox chain activation when utilizable sugars are applied (Vardanian) 249

Indium tin oxide,
photocurrent transients from the semiconductor–protein interface (Ramsden et al.) 269
Inhibitors,
electrochemical approach to chemically driven proton pumps. The effects of secondary reactions, uncouplers, ——— and ionophores (Naumann) 223
Ionic strength,
influence of the ——— on enzyme solubilization in water-in-oil microemulsions (Bratko et al.) 291
Ionophores,
electrochemical approach to chemically driven proton pumps. The effects of secondary reactions, uncouplers, inhibitors and ——— (Naumann) 223

Liquid membranes,
amino acid transport through supported ———: mechanism and its application to enantiomeric resolution (Yamaguchi et al.) 109
LS fibroblasts,
on the audio- and radio-frequency dielectric behaviour of anchorage-independent, mouse L929-derived ——— (Davey et al.) 83
Lung surfactant,
present knowledge in the field of ——— electrochemistry (Ladanyi) 287
Lysis,
potential-controlled morphological change and ——— of HeLa cells cultured on an electrode surface (Yaoita et al.) 169

Magnesium,
proton–——— exchange during the blue–purple transition of bacteriorhodopsin (Tsuji, Hess) 203
Membrane perturbation,
potential-controlled morphological change and lysis of HeLa cells cultured on an electrode surface (Yaoita et al.) 169

Metal ion,
electrochemical study of the ——— coordination of bioactive molecules (Burger) 33
Microemulsions,
influence of the ionic strength on enzume solubilization in water-in-oil ——— (Bratko et al.) 291
Monolayers,
stoichiometry of the binding of Ca^{2+} on the inner and the outer ——— of sonicated vesicle bilayers (Disalvo, Bakás) 257

Nucleic acids,
new trends in electrochemical analysis of ——— (Paleček) 179

Phospholipid,
facilitation of the permeability of ——— vesicles to Tl^+ by prothrombin (Lecompte, Miller) 99
Photocurrent transients,
——— from the semiconductor–protein interface (Ramsden et al.) 269
Protein,
photocurrent transients from the semiconductor–——— interface (Ramsden et al.) 269
Prothrombin,
facilitation of the permeability of phospholipid vesicles to Tl^+ by ——— (Lecompte, Miller) 99
Proton,
———–magnesium exchange during the blue–purple transition of bacteriorhodopsin (Tsuji, Hess) 203
Proton pumps,
electrochemical approach to chemically driven ———. The effects of secondary reactions, uncouplers, inhibitors and ionophores (Naumann) 223
Protoplasts,
correlation between physical parameters in electrofusion and electroporation of ——— (Zhelev et al.) 155

Purple membrane,
electrooptical study of ——— fragments in the presence of diamines (Taneva et al.) 241

Radio-frequency,
on the audio-frequency and ——— dielectric behaviour of anchorage-independent, mouse L929-derived LS fibroblasts (Davey et al.) 83
Red blood cells,
electroporation: the population distribution of macromolecular uptake and shape changes in ——— following a single μs square wave pulse (Bliss et al.) 57

Semiconductor,
photocurrent transients from the ———–protein interface (Ramsden et al.) 269
Sugars,
model for regulation of H^+-ATPase functioning in aerobical bacteria by membrane hyperpolarization caused by redox chain activation when utilizable ——— are applied (Vardanian) 249

Thallium,
facilitation of the permeability of phospholipid vesicles to Tl^+ by prothrombin (Lecompte, Miller) 99
Transport system,
how a soluble enzyme can be forced to work as a ———: theoretical interpretation (Vincent et al.) 215

Uncouplers,
electrochemical approach to chemically driven proton pumps. The effects of secondary reactions, ———, inhibitors and ionophores (Naumann) 223

Vesicle bilayers,
stoichiometry of the binding of Ca^{2+} on the inner and the outer monolayers of sonicated ——— (Disalvo, Bakás) 257

BIOELECTROCHEMISTRY AND BIOENERGETICS

Vol. 20 Nos. 1–3 December 1988

(J. Electroanal. Chem., Vol. 254 Nos. 1–3)

CONTENTS

Bioelectroanalytical sensors and analytical problems in their application (Review)
G. Nagy and E. Pungor (Budapest, Hungary) 1

Electrosynthesis and electroanalysis using *Clostridium sporogenes*
E.W. James, D.B. Kell, R.W. Lovitt and J.G. Morris (Aberystwyth, Great Britain) 21

Electrochemical study of the metal ion coordination of bioactive molecules
K. Burger (Szeged, Hungary) 33

Scanning curves and kinetics of the acetylcholine/acetylcholine receptor hysteresis
E. Neumann, E. Boldt, B. Rauer, H. Wolf (Bielefeld, F.R.G.) and H.W. Chang (New York, NY, U.S.A.) 45

Electroporation: the population distribution of macromolecular uptake and shape changes in red blood cells following a single 50 μs square wave pulse
J.G. Bliss, G.I. Harrison, J.R. Mourant, K.T. Powell and J.C. Weaver (Cambridge, MA, U.S.A.) . 57

Properties of cardiolipin and functional implications for cytochrome oxidase activity
D. Marsh (Göttingen, F.R.G.) and G.L. Powell (Clemson, SC, U.S.A.) 73

On the audio- and radio-frequency dielectric behaviour of anchorage-independent, mouse L929-derived LS fibroblasts
C.L. Davey, D.B. Kell, R.B. Kemp and R.W.J. Meredith (Aberystwyth, Great Britain) 83

Facilitation of the permeability of phospholipid vesicles to Tl^+ by prothrombin
M.F. Lecompte and I.R. Miller (Rehovot, Israel) 99

Amino acid transport through supported liquid membranes: mechanism and its application to enantiomeric resolution
T. Yamaguchi, K. Nishimura, T. Shinbo and M. Sugiura (Tsubuka, Japan) 109

Polarographic and microcalorimetric study of the interaction between glutathione and amoxycillin
J.A. Squella, G. Benavente (Santiago, Chile), B. Gallo (Bilbao, Spain), S. Paredes (Brussels, Belgium) and L.J. Nuñez-Vergara (Santiago, Chile) 125

Effects of electric fields and currents on living cells and their potential use in biotechnology: a survey
J. Teissié (Toulouse, France) 133

Generation of cell processes in a high frequency electric field
L.B. Margolis and S.V. Popov (Moscow, U.S.S.R.) 143

Correlation between physical parameters in electrofusion and electroporation of protoplasts
D.V. Zhelev, D.S. Dimitrov and P. Doinov (Sofia, Bulgaria) 155

Potential-controlled morphological change and lysis of HeLa cells cultured on an electrode surface
M. Yaolta, H. Shinohara, M. Aizawa, Y. Hayakawa, T. Yamashita (Tokyo, Japan) and Y. Ikariyama (Tokorozawa, Japan) 169

New trends in electrochemical analysis of nucleic acids
E. Paleček (Brno, Czechoslovakia) 179

Transduction of redox Gibbs free energy into modulated electrochemical work
F. D'Alba and S. Di Lorenzo (Palermo, Italy) 195

Proton–magnesium exchange during the blue–purple transition of bacteriorhodopsin
K. Tsuji and B. Hess (Dortmund, F.R.G.) 203

How a soluble enzyme can be forced to work as a transport system: theoretical interpretation
J.-C. Vincent, S. Alexandre and M. Thellier (Mont Saint Aignan, France) 215

(*continued on p. 3 of cover*)

Contents (*continued*)

An electrochemical approach to chemically driven proton pumps. The effects of secondary reactions, uncouplers, inhibitors and ionophores
R. Naumann (Darmstadt, F.R.G.) 223

Electrooptical study of purple membrane fragments in the presence of diamines
S.G. Taneva, G. Todorov and I.B. Petkanchin (Sofia, Bulgaria) 241

A model for regulation of H^+-ATPase functioning in aerobical bacteria by membrane hyperpolarization caused by redox chain activation when utilizable sugars are applied
A.G. Vardanian (Yerevan, U.S.S.R.) 249

Stoichiometry of the binding of Ca^{2+} on the inner and the outer monolayers of sonicated vesicle bilayers
E.A. Disalvo and L.S. Bakás (La Plata, Argentina) 257

Photocurrent transients from the semiconductor–protein interface
J.J. Ramsden, R. Toth-Boconádi and L. Keszthelyi (Szeged, Hungary) 269

Short communications

Electrostimulation during fermentation
H.-H. Grosse, E. Bauer and H. Berg (Jena, G.D.R.) 279

Present knowledge in the field of lung surfactant electrochemistry
E. Ladanyi (Göttingen, F.R.G.) 287

Preliminary note

The influence of the ionic strength on enzyme solubilization in water-in-oil microemulsions
D. Bratko, A. Luzar (Ljubljana, Yugoslavia) and S.H. Chen (Cambridge, MA, U.S.A.) 291

Author index 297

Subject index 298

JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY and BIOELECTROCHEMISTRY AND BIOENERGETICS

Publication schedule for the 1989 subscription (please note that Vols. 255–257, belonging to the 1989 subscription, appeared in 1988)

Month	N (1988)	D (1988)	J	F	
J. Electroanal. Chem.	255/ 1+2 256/1	256/2 257/ 1+2	258/1 258/2	259/ 1+2	The publication schedule for further issues will be published later.
Bioelectrochem. Bioenerg.				275/1	

Subscription information

The *Journal of Electroanalytical Chemistry and Interfacial Electrochemistry* (including *Bioelectrochemistry and Bioenergetics*) appears semi-monthly. In 1988, 22 volumes will appear. Subscription price for 1988 (Volumes 233–254): Sfr.4620.00 (approx. US$3422) incl. postage. Subscription price for Bioelectrochemistry and Bioenergetics *only* (Vols. 253 and 254): Sfr.660.00 (approx. US$489) incl. postage. Subscribers in the U.S.A. and Canada receive their copies by air mail. Additional charges for air mail to other countries are available on request. For advertising rates apply to the publisher. Claims for issues not received should be made within three months of publication of the issues. If not, they cannot be honoured free of charge.

Customers in the U.S.A. and Canada wishing information on this and other Elsevier journals should contact the Elsevier Science Publishing Company Inc. Journal Information Center, 52 Vanderbilt Avenue, New York, NY 10017. Tel.: (212) 916-1250.

Abstracts and/or contents lists of this journal are published in: Biological Abstracts, Biosciences Information Services, Chemical Abstracts, Current Contents, Electroanalytical Abstracts, Excerpta Medica, Engineering Index.

Subscriptions should be sent to:

ELSEVIER SEQUOIA S.A., P.O. Box 564, CH-1001 Lausanne 1, Switzerland
